### THE BAILROAD SLAUGHTER.

There seems to be no question as to the cause of the terrible slaughter on the Lehigh Valley Railroad last Wednesday. The accident was directly due to the gross and criminal neglect of the persons in charge of the section of the train which ran into the one immediately in advance, in disregarding the danger signals displayed to check its head-

The train was a heavy one, carrying a very large crowd of excursionists. As customary on such occasions, the train was divided into sections, one following the other at a safe distance. There were six or more of these sections. All these circumstances ought to have prompted such extreme caution as to render an accident impossible, or, at least, very improbable. Yet it is evident that not only were the hands on one section so reckless as to overlook danger signals for which they ought on such an occasion to have kept more than ordinary watch, but that sufficient precaution was not exercised in the distance allowed between the sections.

The lives sacrificed in this awful calamity will probably reach nearly or quite a hundred, besides the injuries inflicted on many who escaped death. What is to be done about it? Is no example to be made of those whose culpable carelessness brought about all this misery and suffering? Is nothing to be done which will compel railroad managers to be more considerate of the safety of passengers hereafter? Is this wholesale, unnecessary butchery to be passed over and forgotten, leaving the evil of incapable and reckless railroad management unchecked? If so, what safety can there be for those who travel by rail?

Mr. B. H. PLANK, a young farmer of Illinois, opposes the application of his wife for divorce on the ground that his marriage to her is null and void. His story is that he was taken from his bed by armed men, carried to his bride's house, and forced at the muzzles of revolvers to go through the ceremony. This certainly seems a very summary way of making a man a Benedict, and as the unwilling husband never lived with his alleged wife, it is probable that the courts will decide that a man cannot be thus compelled to choose between a bride and a bullet.

The Labor party made an imposing demon stration at the Cooper Union last night. If enthusiasm may be taken for an indication of strength, Mr. Coogan, the candidate of the Labor organizations for Mayor, is an adversary not to be despised by the political as pirants to the position. The manner in which the "regular" machines on all sides were handled by the speakers makes it difficult to determine with which old party the supporters of the Labor nominee are the more dissatisfied.

The London Times is in a bad position. The belief that its charges against Mr. Pan-NELL and others of the Irish party were based on gross forgeries is growing into conviction, and people are beginning to understand that the Times must have used the false letters knowing them to have been forged. The Attorney-General and Six HENRY JAMES bave thrown up their briefs and abandoned the case of the Times before the Parliamentary Commission.

The stupidity with which the London police are conducting the search for the Whitechapel murderer is illustrated by the fact that the writing on a shutter, "I have murdered four and will murder sixteen more," at the spot where one of the bodies was found, was wheel out by order of the Chief of the force before it could be photographed. Of course a fac simile of the writing might have furnished a valuable clue to the criminal.

JERSEY CITY POLITICS.

There are five local candidates in the field now all Democrats. They are Congressman McAdoc and four prospective Assemblymen-Donnelly, of the Third; Heppenheimer, of the Fourth; Farrell, of the Eighth, and Short, of the Tenth.

Florist John Reed is talked about as the Repubcan candidate for the Assembly in the Sixth.

As yet the Republicans have settled on no nomi nee for Congress. Seedsman Peter Henderson is the favorite candidate of the talkers. Lawyer M. T. Newbold and State Treasurer John J. Toffey are also in the race.

The First District Republicans are having lots of fun, all by themselves. Four of them want the Assembly nomination, and each toreatens to run independently if he doesn't get it.

Jeweller Frank Demmert, who sets Minnie Palmer's diamonds, will probably be the Demo-cratic candidate in the Fifth. The present Assemblyman, Brown, will oppose him.

prize of \$100 in gold to the first person ending to this office the dates of the three coldest days during the winter of 1838-9. In order to be just and fair, and to give a chance to those whose guesses are to depend in any way on the ancient history of the weather, there has been prepared for publieation a list giving the coldest three days of each year during the past decade. For the information The Evening World is indebted to Seret, Dunn, of the Weather Bureau, who

will himself participate in the guessing. 1878—3d January, 9 degrees above; 3d February, 1 degrees above; 25th December, 12 degree

Here lies the great strain upon the ystem of women; here is the cause why so large a pro sertion of our women complain of being weak, nervous ared and expansied. They have little or no rest; tho fe is one continual round of work-duties here, dut-

fatigued and wake tired and unrefreshed in the morning What wonder that they become worn out, so to speak, nerve and vital power? What wonder that they ba great weakness, exhaustion, pains in the back an mbs, together with the distressing female complaint which are always caused by the loss of vital strength and vigor? Yet they keep about their work long after they realize that they ought to call themselves sick and re-main in bed, held up by the thought that they must do their date, and so they continue to work upon their perves day after day.

Fading Under the Weakening Influence of these diseases, ignorant of the real cause of their de-chning health. There will at first be a tired, languid coling, with a sense of exhaustion upon waking in the norning. The patient tires easily, having little power of endurance; there is often a bad taste in the mouth, with a faintness or sinking at the stomach; there will be loss of appetite, or it will become variable, and digestion will become impaired. The patient gradually becomes nervous, restless and urritable, and there is often mor or less loss of sleep, with prostration instead of recupera-tion from the night's rest.

"These symptoms will, in many cases, be attended b pains in the side, back or abdomen, and the nervousness and sense of weakness will become more and more marked, until the sufferer declares she is tired all the time, every movement or exertion being an effort. Then follow the long train of disagreeable and often paintul local symptoms, including lencer-free, irregularities, weak back, falling of womb, bearing-down pains, congration, inflammation, ulceration or ovarian difficulties. These symptoms will be followed by gradually confirmed invalidism unless a cure from the distressing affections obtained.

men do, that these affections are incurable. The fact that they have tried many physicians who have faile o effect a cure does not by any means prove that the lisense cannot be cured by a physician who has made a special study and investigation of such chronic difficties. No physician can be slike skilful in the cure of a classes of diseases, and the general practitioner ha wither the time nor the facilities to give that investiga tion and study necessary to acquire the proper kno edge and treatment of these chronic affections. It is specialist who, by research and practical experie among thousands of similar cases, has an absolut Knowledge of the Exact Conditions.

should apply for treatment. " Again, the treatment used by the ordinary physici but often proves injurious in its effects, leaving the patient in a worse condition than before. All thes wrong; the treatment and remedies used should be mild and efficacious. Nature has bountifully provided harmless vegetable remedies for just these conditions, and under their restorative effects the digestive and ac lative powers are improved, the blood cleaned purified, the pervous system invigorated, the loca symptoms gradually dissappear, and health and strength

ake the place of weakness and prostration."

Dr. Greene is certainly an authority upon these subects, having made this class of diseases, their cause and cure. a special study. He has, moreover, an ur nauri opportunity to gain a most thorough understand-ing of their nature and the diseased conditions which attend such difficulties, together with a perfect knowl edge of their treatment and cure, by means of the man; thousand cases which, from his large and widespread practice, are constantly under his professional care. The failure of ordinary physicians to cure dises and many a woman has become

Completely Discouraged by repeated failures to be cured, and many from such discouragement have come to almost abandon all hope of cure. The remarkable success in curing such cases which has attended the practice of Dr. Greene makes nore prominent, and places him in the very first rank

of physicians who make a specialty of this class of Greene's remarkable success in curing these diseases is due to his great skill as a physician, it is no loss a fact that the thousands of women who owe their restora-tion from these distressing affections to his treatment

owe it, in part at least, to the wonderful vegetable

remedies which he uses. These harmless remedies are Nature's true medicines, and are really wonderful in their soothing, hearing and strengthening powers. These marvellous remedies are in all cases efficac their results. They build up the general health and strength, tone up and invigorate the nerves, cure al local female troubles and restors vitality and energy t the exhausted system. In this manner and by these remedies thousands of women have been and are being cured, and no one suffering from these distressing female complaints should delay in consulting Dr

Another great advantage to sufferers is the fact that Dr. Greene can be consulted free. Consultation and advice are in all cases free of charge, either personally or by letter, at the office, 35 West 14th st., New York. This renders it possible for all to obtain a cure at the cost of only the necessary medicines. The Doctor's mportant new book, "Facis Worth Knowing," will be

important new book, "Facts Worth Knowing," will be mailed free to any address.

We have taken occasion in these columns several times to report the Dector's lectures and to speak in the highest terms of his mode of treatment. This we should not do were we not satisfied as to the Doctor's marvel lous skill as a physician and the constantly demonstrated beneficial results of his wonderful medicines.

We therefore feel that in recommending these suffering from any form of female complaints to adopt his treat ment by harmiess vegetable remedies we are advising them for their best good, and feel confident that a perfeet and permanent cure will result.

The Special Sale at Ridleys' Proves a Magnet to Shoppers.

The opening of the special sale of fall goods at Ridley & Co. 's, at Grand and Allen streets, yesterday, was an opportunity for seeing and purchasing which the fair sex seized upon with avidity. A handsome parlor was fitted up for the occasion and in it Mme. Bedington, the firm's modiste, heid court throughout the day. Around the room in glass-cases the wonders of the milliner's art are displayed. The Laugtry toque seemed to attract

displayed. The Langtry toque seemed to attract the most favorable comment. It is a neat turban of velvet, trimmed with also and surmounted with algrette, and ornamented in front with a cluster of humaning-birls. In calidren's headgest there is also an array of novelties.

The fur department is rich in sealskin and fur wraps, newmarkets, English walking Jackets and sacques, besides mulfs and boas of various skins.

The dress goods, however, divided the bonors of the day with the millinery, and admiring fair ones clustered about the wonderful costumes displayed, miling the air with excamations of delight. Gowns and cloaks, bornets and hats, latest styles and most excellent materials, were topics of which the throng never weared.

Bire-a-bree may be had at Ridleys', too, and this department, together with those for the sale of gentlemen's furnishing goods, linen, hosiery, and

Bric-s-orse may be had at Hidleys', too, and this department, together with those for the sale of gentlemen's furnishing goods, linen, hosiery, and hardware, came in for a fair share of attention resterday, and doubtless will prove attractive throughout the continuance of the special sale this week.
